

COOKIES

For the better operation of the Website and the better navigation of its visitor / user, as well as for the better provision of the Company's services, we use cookies.

Cookies are data files, which are transferred from a web server to the computer of the person who visits the Website. Cookies are an industry standard, used by most websites and facilitate the repeated access of visitors / users to a specific website and its use.

Cookies are not harmful to the system of the visitor / user's computer or to its files and only the website from which a specific cookie was transferred to the visitor / user's computer can be read, modified or deleted. In this way, the Website remembers the actions and preferences of the visitors / users for a period of time, in order to have, for example, personalization of online ads, traffic analysis or other statistical analysis, and provision of the services they have requested. This way, each visitor / user does not have to enter their preferences every time they visit the Website. The Company and its specially authorized partners have access to any information regarding cookies.

If you do not wish to collect information through cookies you can use the settings of most web browsers, with which you can delete existing cookies and choose whether to automatically reject future cookies or decide to reject them. or accept any specific cookies on your computer. It is noted that the rejection of cookies may have the effect of making it difficult or impossible to use certain parts of the Website.
